

FOCUSED ON HIGH GRADE GOLD IN CANADA'S RED LAKE DISTRICT

Investment Highlights:

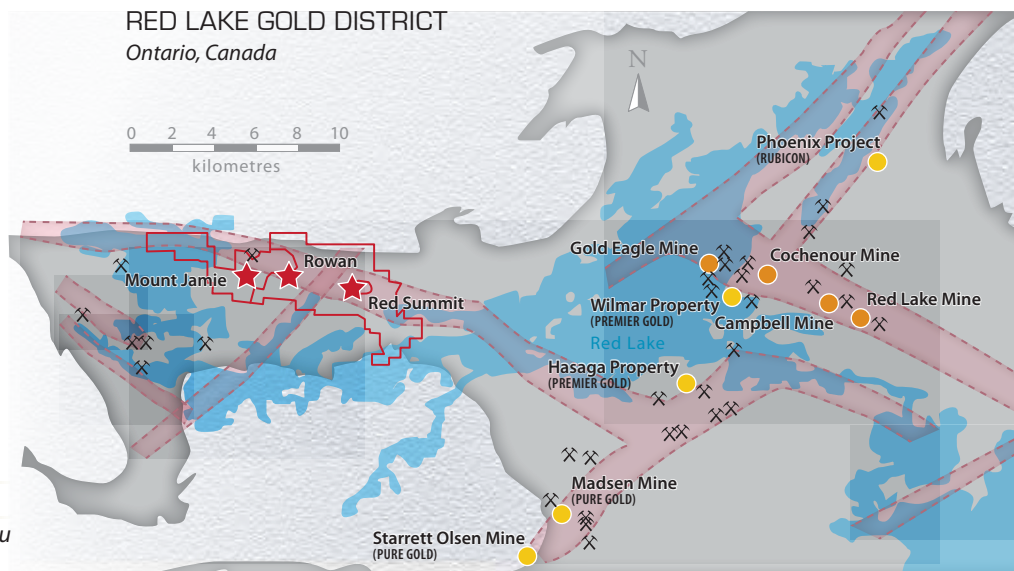

- +1 million inferred ounces of high grade gold in the prolific Red Lake Gold District of Ontario, Canada – resource open at depth.
- West Red Lake Project hosts three former gold mines, located only 20 km from Goldcorp on a key geological structure.
- Goldcorp is a funding partner at the Rowan Mine property (RLG 60% – operator; Goldcorp 40%).
- Management team track record: growing junior resource companies and attracting high profile acquisition partners.
- Drill programs ongoing through 2017.

The Red Lake Gold District is host to some of the richest gold deposits in the world and has produced over 30 million ounces of gold from high grade zones, including 18 million ounces from the nearby Red Lake Mine and Campbell Mine operated by Goldcorp.

WEST RED LAKE
GOLD MINES INC

West Red Lake Project Highlights:

- 3100 hectare property encompassing three former gold mines:
 - Rowan Mine
 - Red Summit Mine
 - Mount Jamie Mine
- Property has a 12km strike length and falls along the intersection of key geological structures (Pipestone Bay St Paul Deformation Zone, Golden Arm Structure, and the NT Zone).
- Major gold deposits in the Red Lake Gold District are associated with regional scale deformation zones. The most significant deposits occur where two of the regional structures intersect.
- Exploration work is focused on drilling high grade gold zones situated on the Rowan Mine property (RLG 60% - operator; Goldcorp 40%).
- Good potential to upgrade and increase the current inferred resource (Feb. 2016 NI 43-101).
