WEST RED LAKE GOLD MINES INC.

MANAGEMENT DISCUSSION & ANALYSIS – QUARTERLY HIGHLIGHTS

June 30, 2017

This Management Discussion and Analysis (“MD&A”) of West Red Lake Gold Mines Inc. (“West Red Lake Gold”, “RLG” or the “Company”) is dated August 22, 2017. This MD&A has been prepared to provide material updates to the business operations, liquidity and capital resources of the Company since its last management discussion & analysis, being the Management Discussion & Analysis (“Annual MD&A”) for the fiscal year ended September 30, 2016. This MD&A does not provide a general update to the Annual MD&A, or reflect any non-material events since the date of the Annual MD&A. The Board of Directors carries out its responsibility for review of this disclosure principally through its audit committee. The audit committee reviews this disclosure and recommends its approval to the Board of Directors.

This MD&A has been prepared in compliance with the requirements of section 2.2.1 of Form 51-102F1, in accordance with National Instrument 51-102 – Continuous Disclosure Obligations. This discussion should be read in conjunction with Annual MD&A, the audited annual financial statements of the Company for the years ended September 30, 2016 and 2015 and the unaudited condensed interim financial statements for the three and nine months ended June 30, 2017, together with the notes thereto. All amounts are in Canadian dollars unless otherwise specified.

The unaudited condensed interim financial statements for the three and nine months ended June 30, 2017, have been prepared using accounting policies consistent with International Financial Reporting Standards (“IFRS”) as issued by the International Accounting Standards Board and interpretations of the IFRS Interpretations Committee. The unaudited condensed interim financial statements have been prepared in accordance with International Standard 34, Interim Financial Reporting.

The unaudited condensed interim financial statements for the three and nine months ended June 30, 2017, the audited annual financial statements for the years ended September 30, 2016 and 2015, the Annual MD&A and additional information, including the Company’s Certifications of Annual and Interim Filings and news releases, are available on the Canadian System for Electronic Document Analysis and Retrieval (SEDAR) at www.sedar.com.

This MD&A contains certain forward-looking information and forward-looking statements, as defined in applicable securities laws (collectively referred to herein as “forward-looking statements”). These statements relate to future events or the Company’s future performance. All statements other than statements of historical fact are forward-looking statements. Often, but not always, forward-looking statements can be identified by the use of words such as “plans”, “expects”, “is expected”, “budget”, “scheduled”, “estimates”, “continues”, “forecasts”, “projects”, “predicts”, “intends”, “anticipates” or “believes”, or variations of, or the negatives of, such words and phrases, or statements that certain actions, events or results “may”, “could”, “would”, “should”, “might” or “will” be taken, occur or be achieved. Forward-looking statements involve known and unknown risks, uncertainties and other factors that may cause actual results to differ materially from those anticipated in such forward-looking statements. The forward-looking statements in this MD&A speak only as of the date of this MD&A or as of the date specified in such statement. The following table outlines certain significant forward-looking statements contained in this MD&A and provides the material assumptions used to develop such forward-looking statements and material risk factors that could cause actual results to differ materially from the forward looking statements.

Forward-looking statements	Assumptions	Risk factors
Potential of the Company’s properties to contain economic deposits of gold and/or other metals	Financing will be available for future exploration and development of the Company’s properties; the actual results of the Company’s exploration and	Gold price volatility; uncertainties involved in interpreting geological data and confirming title to acquired properties; the possibility that

	<p>development activities will be favourable; operating, exploration and development costs will not exceed the Company's expectations; the Company will be able to retain and attract skilled staff; all requisite regulatory and governmental approvals for exploration projects and other operations will be received on a timely basis upon terms acceptable to the Company, and applicable political and economic conditions are favourable to the Company; the price of gold and/or other applicable metals and applicable interest and exchange rates will be favourable to the Company; no title disputes exist with respect to the Company's properties</p>	<p>future exploration results will not be consistent with the Company's expectations; availability of financing for and actual results of the Company's exploration and development activities; increases in costs; environmental compliance and changes in environmental and other local legislation and regulation; interest rate and exchange rate fluctuations; changes in economic and political conditions; the Company's ability to retain and attract skilled staff</p>
<p>The Company's ability to meet its working capital needs at the current level for the twelve-month period ending June 30, 2018 and beyond</p> <p>The Company expects to incur further losses in the development of its business</p>	<p>The operating and exploration activities of the Company for the twelve-month period ending June 30, 2018 and beyond, and the costs associated therewith, will be consistent with the Company's current expectations; debt and equity markets, exchange and interest rates and other applicable economic conditions are favourable to the Company</p>	<p>Changes in debt and equity markets; timing and availability of external financing on acceptable terms; changes in the operations currently planned; increases in costs; environmental compliance and changes in environmental and other local legislation and regulation; interest rate and exchange rate fluctuations; changes in economic conditions</p>
<p>The Company's ability to carry out anticipated exploration on its property interests</p>	<p>The exploration activities of the Company for the twelve-month period ended June 30, 2018, and the costs associated therewith, will be consistent with the Company's current expectations; debt and equity markets, exchange and interest rates and other applicable economic conditions are favourable to the Company</p>	<p>Changes in debt and equity markets; timing and availability of external financing on acceptable terms; increases in costs; environmental compliance and changes in environmental and other local legislation and regulation; interest rate and exchange rate fluctuations; changes in economic conditions; receipt of applicable permits</p>
<p>Plans, costs, timing and capital for future exploration and development of the Company's property interests, including the costs and potential impact of complying with existing and proposed laws and regulations</p>	<p>Financing will be available for the Company's exploration and development activities and the results thereof will be favourable; actual operating and exploration costs will be consistent with the Company's current expectations; the Company will be able to retain and attract skilled staff; all applicable regulatory and governmental approvals for exploration projects and other operations will be received on a timely basis upon terms</p>	<p>Gold price volatility, changes in debt and equity markets; timing and availability of external financing on acceptable terms; the uncertainties involved in interpreting geological data and confirming title to acquired properties; the possibility that future exploration results will not be consistent with the Company's expectations; increases in costs; environmental compliance and changes in environmental and other local legislation and</p>

	acceptable to the Company; the Company will not be adversely affected by market competition; debt and equity markets, exchange and interest rates and other applicable economic and political conditions are favourable to the Company; the price of gold and/or other applicable metals will be favourable to the Company; no title disputes exist with respect to the Company's properties	regulation; interest rate and exchange rate fluctuations; changes in economic and political conditions; failure to incur qualified expenditures for certain tax credits; the Company's ability to retain and attract skilled staff
Management's outlook regarding future trends, including the future price of gold and availability of future financing	Financing will be available for the Company's exploration and operating activities; the price of gold and/or other applicable metals will be favourable to the Company	Gold price volatility; changes in debt and equity markets; interest rate and exchange rate fluctuations; changes in economic and political conditions
Sensitivity analysis of financial instruments	Interest rates will not be subject to change in excess of plus or minus 1% based on management's knowledge and experience of the financial markets, the Company believes that there would be no material changes to its results for the nine month period ended June 30, 2017, as a result of changes in foreign exchange rates	Changes in interest rates and exchange rate fluctuations
Prices and price volatility for gold	The price of gold will be favourable; debt and equity markets, interest and exchange rates and other economic factors which may impact the price of gold will be favourable	Changes in debt and equity markets and the spot price of gold; interest rate and exchange rate fluctuations; changes in economic and political conditions

Inherent in forward-looking statements are risks, uncertainties and other factors beyond the Company's ability to predict or control. Please also make reference to those risk factors referenced in the "Risk Factors" section below. Readers are cautioned that the above chart does not contain an exhaustive list of the factors or assumptions that may affect the forward-looking statements, and that the assumptions underlying such statements may prove to be incorrect. Actual results and developments are likely to differ, and may differ materially, from those expressed or implied by the forward-looking statements contained in this MD&A.

Forward-looking statements involve known and unknown risks, uncertainties and other factors that may cause the Company's actual results, performance or achievements to be materially different from any of its future results, performance or achievements expressed or implied by forward-looking statements. All forward-looking statements herein are qualified by this cautionary statement. Accordingly, readers should not place undue reliance on forward-looking statements. The Company undertakes no obligation to update publicly or otherwise revise any forward-looking statements whether as a result of new information or future events or otherwise, except as may be required by law. If the Company does update one or more forward-looking statements, no inference should be drawn that it will make additional updates with respect to those or other forward-looking statements, unless required by law.

OVERVIEW

West Red Lake Gold is focused on exploring and developing potential gold resources at its 3100 hectare West Red Lake Project property located in the Red Lake Gold District 20km west of some of the highest grade gold mines in Canada. The West Red Lake Project hosts three former gold mines situated on the Pipestone Bay St Paul Deformation Zone which strikes east-west across the 12km property and then continues east towards the town of Red Lake, Ontario. The Rowan Mine property, Mount Jamie Mine property, and Red Summit Mine property are situated on this major regional geological structure and present the Company with a 12km long exploration horizon in a safe and mine-friendly jurisdiction.

The West Red Lake Project consists of three contiguous properties. The Rowan Mine property is 60% owned and operated by the Company and 40% owned by Goldcorp. West Red Lake Gold owns a 100% interest in the Mount Jamie Mine property and Red Summit Mine property.

The Company's geological database on the West Red Lake Project property provides West Red Lake Gold with attractive targets for ongoing exploration and development drilling programs. Significant opportunity exists for expansion of the Company's gold mineral inventory.

The Company filed a Technical Report and Resource Estimate on the West Red Lake Project on Sedar.com on February 18, 2016 which included an underground inferred mineral resource estimate of 4,468,900 tonnes at an average grade of 7.57 grams gold per tonne containing 1,087,700 ounces of gold with a cut-off grade of 3.0 grams per tonne on the Rowan Mine property. The inferred resource is located along a 1.8km strike length from surface down to a depth exceeding 350m at the location of the historic underground Rowan Mine.

The mineral resource estimate is based on a 3D Block Model interpolated using Inverse Distance squared (ID2) methods to extrapolate grades. The software used for all geostatistical analysis and computation was Dassault Systems, Geovia GEMS version 6.5. The database utilized contained 570 diamond drill holes, and a total of 36,062 assay records.

Inferred Resource			
Total	Tonnes	Grade (grams/tonne Au)	Contained ounces Au
	4,468,900	7.57	1,087,700

Note: Price of Au: US\$1150; Exchange rate US\$: CDN \$0.77; Block cut-off grade: 3.0 gpt Au; numbers may differ due to rounding

OVERALL PERFORMANCE

Principal Business and Corporate History

West Red Lake Gold is a Toronto based company listed on the Canadian Securities Exchange (CSE: RLG), OTCQB (OTCQB: RLGMF) and Frankfurt Stock Exchange (FWB: HYK) and is focused on gold exploration and development in the prolific Red Lake Gold District of Northwestern Ontario, Canada. The Red Lake Gold District is host to some of the highest grade gold deposits in the world and has produced nearly 30 million ounces of gold from high grade zones, including 18 million ounces from the Goldcorp operated Campbell, Cochenour, and Red Lake Mines which are situated 20km east of the Company property, the West Red Lake Project.

The financial condition of the Company is affected by various factors, including operating costs, interest rates, regulatory and environmental compliance, general and administrative costs, the level of exploration and development expenditures and other discretionary costs. While West Red Lake Gold seeks to manage the level of risk associated with its business, many of the factors affecting these risks are beyond the Company's control.

Exploration Activities and Plans

Exploration is anticipated to be oriented on areas of the West Red Lake Project which are prospective for the development of gold mineralization. Several gold mineral occurrences are present on the West Red lake Project which is comprised of Rowan Mine property, the Red Summit Mine property, and the Mount Jamie Mine property.

The Summer 2017 phase of the exploration drill program consisted of 2,545m of drilling in sixteen holes including fifteen holes designed to explore the Mount Jamie Mine Zones and one hole on the Rowan Mine property to test a target in the previously unexplored south-east quadrant of the Structural Intersection area. The drill core has been logged and samples have been sent out for assays.

Fifteen holes ranging from 50 to 150m below surface were drilled into the Mount Jamie Mine Zones which appear to be geologically similar to the Rowan Mine Zones. Both the Mount Jamie Mine Zones and the Rowan Mine Zones lie within the Pipestone Bay St Paul Deformation Zone. Gold zones are hosted within a sequence of hydrothermally altered mafic volcanics with intercalated

felsic volcanics and porphyries as well as ultramafics. The gold mineralization is associated with quartz veining and increased iron sulphide mineralization.

Deeper drilling to extend the Rowan Mine Zones to greater depth is planned in future work programs.

Exploration Targets The below map shows the project geology with three former mines situated on the east-west trending Pipestone Bay St Paul Deformation Zone. The Structural Intersection is in the area of the red circle in the image below.

Recent Project Developments

Fiscal 2017

During January and February 2017, the Company completed 3,014m of drilling in nine holes that was designed to further explore and expand the Rowan Mine Zones with exploration drilling. Drill results indicate that depth potential represents the primary opportunity to expand the Rowan Mine Zones. See the April 26, 2017 news release for complete drill results table.

Two holes were drilled to expand the gold zones to depth in the central area of the east-west trending Rowan Mine Zones. Hole RLG 17-45 intersected 72.6 grams per tonne gold ("g/t Au") over 3.0m and Hole RLG 17-44 intersected 21.9 g/t Au over 1.0m.

Three holes were drilled at the eastern end of the Rowan Mine Zones. Hole RLG 17-46 intersected 16.05 g/t Au over 1.0m. Two additional holes were drilled further east to expand the gold mineralized zones along strike and did not return any gold values. Four holes drilled to the west

intersected the gold bearing zones over widths ranging from 4.0m to 15.0m and returned weak gold values.

Fiscal 2016

The purpose of the November 2015 drill program was to explore the east-west trending Pipestone Bay St Paul Deformation Zone (the "PBS Zone") further to the east of the established Rowan Mine Gold System where exploration drilling took place in the previous year. The program traced the geological structure to the east of the Rowan Mine Gold System with the purpose of identifying potential exploration targets. The Company drilled a total of 1,657m in six holes along the east-west trending geological strike.

The first five holes intercepted gold values in the steeply dipping regional deformation structure. The sixth and most easterly hole RLG 15-24 provided the best result of 69.55g/t Au over 1.5m and was drilled into the western end of the alteration associated with the Structural Intersection. The intercept was at 297.0m - 298.5m down the hole which was drilled to the north at a - 45 degree dip. The sixth hole showed significantly increased thickness of silicification within the mafic host rock along with increased thickness of ultramafics, sediments (including iron formation), and porphyry rocks.

The Structural Intersection of the two regional structures is interpreted to have altered a portion of the east-west trending regional structure over a distance of up to 1,500m with hole RLG 15-24 situated at the western end, and the Red Summit Mine located near the eastern end of this 1,500m long favourable exploration horizon.

The exploration horizon begins at hole RLG 15-24 and continues east for 450m to the edge of the Structural Intersection. The Structural Intersection itself is approximately 300m wide. A significant volume of porphyry rock is present on the east side of the Structural Intersection where the east-west regional structure continues and trends east for an additional 750m towards the Red Summit Mine.

The Structural Intersection of the two regional structures containing ultramafics as well as iron rich sediments and volcanics creates the potential for significant gold deposition in the geological folds and fractures which typically occur in association with the intersection of geological structures, similar to gold mineralization seen at productive mines in Red Lake.

The six holes, RLG 15-19, 20, 21, 22, 23 and 24, were drilled to the north into the east-west trending PBS Zone. The initial five holes traced the structure eastwards towards where the north-east trending Golden Arm Structure intersects with the PBS Zone - the Structural Intersection. The sixth hole RLG 15-24 was drilled into the western end of the alteration associated with the Structural Intersection.

Hole RLG 15-24 intersected intercalated volcanic rock units consisting of argillaceous graphites, feldspar porphyries and QFP along with cherty banded iron formations carrying sulphides. Silicification or quartz veining with gold values occurred close to lithological contacts.

In addition to the high grade intercept grading 69.55g/t Au over 1.5m at 297m to 298.5m down hole, there are three additional zones with widths of 2.8m, 1.2m and 2.5m between 230m and 248m down hole RLG 15-24.

On February 18, 2016, the Company filed a NI 43-101 Technical Report and Resource Estimate on the 3,100 hectare West Red Lake Project.

Beginning early June 2016, the Company commenced drilling to follow up on the recent result of 69.55 g/t Au over 1.50 metres from RLG Hole 15-24. The purpose of the early stage exploration drill program was to identify and follow east-west trending gold zones eastwards to the intersection of two regional gold bearing structures, referred to as the Structural Intersection. The intersection of two regional structures creates potential for significant gold deposition in the geological folds and fractures which typically occur in association with such an intersection.

Drilling started in the area of Hole RLG 15-24 and successive drill holes moved progressively to the east over a distance of approximately 700 m.

The Company drilled 2,365 m in eight holes consisting of seven new holes plus the extension of Hole RLG 15-24. The drill holes followed the PBS Zone to the east towards the intersection with the NT Zone. The final drill hole intercepted a rock unit with good mineralization and alteration that appears to be similar to the NT Zone, and could be the NT Zone wrapped around the north side of the PBS Zone, at the location where a Hinge Zone has been interpreted to occur.

The best results were from Hole RLG-16-31 which included 50.41 g/t Au over 1.50 m and 22.72 g/t Au over 1.50m. See September 8, 2016 press release for full drill results. The final drill hole, RLG-16-31, which contained the high grade gold, intersected a highly silicified, clastic/brecciated, volcanoclastic unit. The alteration appears to be similar to the alteration in the NT Zone. Hole RLG 16-31 was drilled west to east into the NT Zone and was located near the northern limit of the Structural Intersection area.

In September 2016, the Company completed 2,811m of drilling in eight holes. Six holes tested the down dip extension of the Rowan Mine Zones and two holes further tested the potential of the Structural Intersection area. Earth Sciences Services provided the Company with three proposed holes into the southeastern portion of the Structural Intersection area.

Highlights include (see full details in December 6, 2016 press release):

Structural Intersection

- 26.85 g/t Au over 1.00m

Rowan Mine

- 8.74 g/t Au over 3.50m, including 23.01 g/t Au over 1.00m
- 8.97 g/t Au over 1.20m
- 1.88 g/t Au over 12.3m, including 24.23 g/t Au over 0.50m
- 11.66 g/t Au over 1.10m

The six holes at the Rowan Mine were designed to expand the western half of the Rowan Mine resource to depth. Five of the holes were drilled to depths ranging between 250 and 400m below surface and the sixth hole was drilled to a depth of approximately 100m. The intercepts are 50 to 100m below previous intercepts in their vicinity within the Rowan Mine Zones. The two holes were drilled on the west side of the Structural Intersection area and to the south of the location of hole RLG 16-31.

Exploration on all of the Company's West Red Lake Project is conducted under the supervision of Kenneth Guy, P.Geo, a Qualified Person as defined under National Instrument 43-101. Mr. Guy has read and approved the technical and scientific information contained in this MD&A

Recent Corporate Developments

(i) In December 2016, the Company completed a non-brokered private placement of 4,262,500 flow-through units at \$0.20 per unit for aggregated gross proceeds of \$852,500. Each flow-through unit consists of one flow-through common share and one-half of a common share purchase warrant. Each full warrant entitles its holder to purchase one common share at an exercise price of \$0.35 per share for a period of 18 months from the date of issuance. In connection with the financing, the Company paid finders' fees of \$58,135 in cash.

(ii) In December 2016, the Company issued 771,776 common shares at a deemed price of \$0.20 per share for \$154,355 of services to the Company by several providers and granted a total of 350,000 options to consultants at an exercise price of \$0.20 per share for a term of three years.

(iii) In December 2016, the Company received a reimbursement of Rowan expenditures of \$325,678 from its joint venture partner.

(iv) In June 2017, the Company issued 1,354,007 common shares, with a fair value of \$270,801, in exchange for services rendered.

(v) In June 2017, the Company issued 266,666 common shares on the conversion of convertible debentures. In July 2017, the Company issued 3,333,333 common shares on the conversion of the remaining convertible debenture.

(vi) In June 2017, the Company issued 11,335 common shares for an interest payment on the convertible debentures. In July 2017, the Company issued 131,250 common shares for the final interest payment on the convertible debentures.

(viii) During the nine months ended June 30, 2017, 1,965,500 warrants were exercised for total proceeds of \$198,200 and 100,000 stock options were exercised for total proceeds of \$18,000.

RESOURCE PROPERTIES

The Company's properties are as follows:

The 3100 hectare West Red Lake Project consists of three contiguous properties located in Red Lake Mining Division, District of Kenora (Patricia Portion), Northwestern Ontario. The West Red Lake Project is 20km west of Red Lake, Ontario, 250k northeast of Winnipeg, Manitoba, 150km north northwest of Dryden, Ontario and 430km northwest of Thunder Bay, Ontario. The property is part of the historic Red Lake Gold District and hosts three former gold mines - the Mount Jamie Mine, Rowan Mine, and Red Summit Mine.

(a) *Mount Jamie Mine Property*

The Mount Jamie Mine property is comprised of 26 claims which were assembled through a series of transactions of properties that are contiguous to and include the original nine-claim Mount Jamie Mine property.

(1) In 2005, the Company entered into an option agreement to acquire a 75% interest in nine patented mining claims from Jamie Frontier Resources Inc. for \$80,000 in cash, 550,000 common shares of the Company, exploration work totaling \$1 million, and a 3% Net Smelter Royalty ("NSR").

During 2007, the Company completed the acquisition of the remaining 25% interest in the Mount Jamie Mine property for 2,000,000 common shares of the Company. The Company now has a 100% in the nine mining claims located in the Red Lake Gold District in Ontario.

(2) During 2007, the Company entered into an option agreement to earn a 100% interest in five mining claims contiguous to the east of the Mount Jamie Mine property. Total consideration for these claims consisted of cash payments of \$70,000, the issuance of 200,000 common shares of the Company and a commitment to carry out exploration work totaling \$140,000, or cash/shares in lieu of, over a four year period. In February 2012, having met all of the requirements under the option agreement, the Company exercised its option and now owns a 100% interest in the mining claims. The property is subject to a 3% NSR in favour of the vendors, with an annual advance royalty in the amount of \$10,000 plus a onetime payment of \$500,000 due on the Company completing a bankable feasibility study.

(3) During 2007, the Company entered into an option agreement to acquire a 100% interest in a six mining claim property adjacent to the Mount Jamie Mine property. The claims are contiguous to the west along strike with the Company's existing Mount Jamie Mine property. The Company issued 150,000 common shares as consideration and now owns a 100% interest in the property which is subject to a 3% NSR in favor of the vendors.

(4) During 2008, the Company entered into an option agreement with Rubicon Minerals Corporation to earn a 100% interest in four mining claims contiguous to the south of the Mount Jamie Mine property. The aggregate purchase price consisted of cash payments of \$50,000 and the issuance of 75,000 common shares. The Company now holds a 100% interest in the four mining claims, which is subject to a 2% NSR in favor of Rubicon Minerals Corporation.

(5) During 2010, the Company entered into an option agreement to earn a 100% interest in two mining claims contiguous to the east of the Mount Jamie Mine property. The aggregate purchase price consists of cash payments of \$125,000, the issuance of 100,000 common shares of the Company over a four year period to 2014. Payments to date under the original option amounted to \$85,000 cash and 100,000 common shares. The property is subject to a 2% NSR in favor of Rubicon Minerals Corporation. On November 24, 2014, the Company amended the option agreement to change the remaining cash commitment of \$40,000 for the year ending September 30, 2015 into two payments with each consisting of \$11,000 and 250,000 common shares on December 31, 2014 (paid and issued) and December 31, 2015 (paid and issued), respectively.

(b) Rowan Mine Property

(1) During 2008, the Company entered into an Option and Joint Venture Agreement with Red Lake Gold Mines ("RLGM"), related to RLGM's 117 claim, 2,187 hectare Rowan Mine property, which is contiguous to the east of the Mount Jamie Mine property.

During fiscal 2011, the Company met the requisite exploration expenditures of \$2,500,000 on the Rowan Mine property and exercised its option to acquire a 60% joint venture ownership interest in the property. RLGM advised the Company that it did not intend to exercise the Option Back-In Right to purchase a 20% interest in the property for \$5,000,000. Accordingly, the Company issued 1,000,000 common shares in favour of RLGM, with a fair value of \$340,000.

Subsequent to the formation of the joint venture, RLGM has a joint venture back-in right to purchase 11% interest in the property from the Company, within 90 days of the joint venture expending \$5,000,000 on operations, for \$7,000,000. If RLGM exercises the joint venture back-in right, it will thereafter have a 51% joint venture interest and the Company will have a 49% joint venture interest in the Rowan Mine property.

The property is subject to a 2% NSR.

(2) During 2008, the Company entered into an option agreement with Claude Resources Inc. to earn a 100% interest in two patented mining claims containing the former Red Summit Mine and surrounded by the Rowan Mine property. Total consideration for the claims included a cash payment of \$25,000 plus work commitments of \$100,000. The Company has made the cash payment and completed its work commitments. The mining claims have been transferred into the name of the Company.

The property is subject to a 3% NSR.

Project Expenditures

	Mount Jamie	Rowan	Red Summit	Total
Balance at September 30, 2016	\$5,357,880	\$5,282,700	\$653,665	\$11,294,245
Advanced royalties	10,000	-	-	10,000
Assays	-	26,533	-	26,533
Consulting	42,790	178,827	-	221,617
Drilling	156,099	374,860	-	530,959
Leases and taxes	4,562	2,366	98	7,026
Supplies and camp costs	33,477	64,348	-	97,825
Reimbursements	-	(325,678)	-	(325,678)
Balance at June 30, 2017	\$5,604,808	\$5,603,956	\$653,763	\$11,862,527

RESULTS OF OPERATIONS

Three months ended June 30, 2017, compared with three months ended June 30, 2016

The Company has no revenue or operating cash flow. For the three months ended June 30, 2017, the Company's net loss and comprehensive loss amounted to \$518,117 versus a net loss and comprehensive loss of \$514,225 for the three months ended June 30, 2016.

The difference is primarily attributable to:

- Management fees increased by a total of \$22,500 for the three months ended June 30, 2017. The increased fees related to increased monthly management fees during the current period.
- Marketing, investor relations and travel and entertainment increased by a total of \$276,897 for the three months ended June 30, 2017. The increased fees related to the use of consultants as well as increased costs related to trade shows and other promotional expenses. A portion of these fees were settled in shares as agreed to by the consultants.
- Share-based payments were \$nil for the three months ended June 30, 2017 versus \$258,770 in the prior period. The decrease is due to the issuance of 900,000 stock options in the period versus nil in the current.
- All other expenses related to general working capital purposes and have increased due to the increased activity of the Company.

LIQUIDITY AND CAPITAL RESOURCES

The Company had a working capital of \$252,557 (\$468,570 excluding convertible debentures settled in shares subsequently), as at June 30, 2017 (September 30, 2016 - \$948,113).

Though the Company has sufficient working capital to pay for administrative costs for the next 12 months, the Company will need to continue to raise additional amounts to advance its exploration program. There is no assurance that such additional financing will be available as required, or under favourable terms. See "*Recent Corporate Developments*" section above.

Commitments:

(a) Pursuant to a letter of agreement related to the 5 Golden Tree claims portion of the 26 claim Mount Jamie property dated March 5, 2007, a one-time payment of \$500,000 is to be paid within 30 days of the Company obtaining a bankable feasibility study. In addition, the Company must make advance royalty payments of \$10,000 per year, which will be deductible from future net smelter royalties, if any.

ENVIRONMENTAL LIABILITIES

The Company is not aware of any environmental liabilities, obligations or responsibilities associated with the Company's mining interests.

Off-Balance Sheet Transactions

The Company has not entered into any off-balance sheet arrangements.

Proposed Transactions

As is typical of the minerals exploration and development industry, the Company continues to review property and competitor company information in search of future opportunities in terms of new property acquisitions and business partnerships. Although no transactions are in progress currently, the Company endeavours to continue research into potential opportunities, and to keep business relationships open should opportunities arise.

RISK FACTORS

West Red Lake Gold's business of exploring mineral resources involves a variety of operational, financial and regulatory risks that are typical in the natural resource industry. In addition to considering the information disclosed in the financial statements and in the other publicly filed documentation regarding the Company available at www.sedar.com, the reader should carefully consider the following information. Any of these risk elements could have material adverse effects on the business of the Company. The Company attempts to mitigate these risks and minimize their effect on its financial performance, but there is no guarantee that the Company will be profitable in the future, and West Red Lake Gold common shares should be considered speculative.
